

Frobbbit!

DNSSEC –perspective from a DNS provider

Eva Frölich
eva@frobbbit.se

Frobbit! is dedicated

- Frobbit! Has pushed DNSSEC internationally many years
- Our CTO has participated actively in the development of DNSSEC

Sign the root!

- No chain is stronger than it's weakest link!

The role of Frobbbit! as DNS provider

- Knowledge of how to run name servers in a secure and reliable way is what our customers buy from us
- DNSSEC is obvious

Holder awareness

- Very limited!!!
- The average domainname holder has no clue what DNSSEC is about
- Many customers have been believers

Biggest problem

- .SE decided to take a yearly fee
- Luckily they changed their mind and made public October 1 that the fee is gone!

Frobbit! decision

- Immediately signed all zones we are running
- It's a DNS service and is included as default when a customer buy DNS service from us.

Frobbbit!

Thanks!
