

DNSSEC from a Registrar perspective

- Which are the incentives for a registrar to provide DNSSEC?
- Key management
 - Should there be individual key for each domain name?
 - Should the Registrant be able to manage its KSK?
 - Should Registrars publish its “DPS” (DNSSEC Policy and Practice Statement)?
- Any new administrative problems?
 - Should DNSSEC be offered as an additional service?
- Any particular problem that can be foreseen with large volumes?
- DNSSEC and Transfers
 - How to handle transfer of a signed domains to a registrar that don't provide DNSSEC?
